EDUCATION

Vivekananda Global University, Jaipur	B.Tech CSE CGPA: 6.7	2020-2024
T.I.T Senior Secondary School, Bhiwani	12 th Percentage: 76%	2019-2020
T.I.T Senior Secondary School, Bhiwani	10 th Percentage: 82%	2017-2018

WORK EXPERIENCE

Python Development Intern	Internpe	16/10/2023-12/11/2023
---------------------------	----------	-----------------------

Completed several projects within given deadline , all of the projects were mainly based of python programming language, I also used several python libraries, OOPs principals to complete the project provided.

W3Care Technologies (Ongoing)

- **PHP Development:** Developed and maintained web applications using PHP, AJAX, MySQL, HTML, CSS, and JavaScript (jQuery). Created a core PHP e-commerce website during the internship period.
- **Laravel Development:** After completing the internship, worked on a live project to build an informative website using Laravel, incorporating AJAX, JavaScript, HTML, CSS, and MySQL.

TECHNICAL SKILLS

- Python(NumPy, OOPs)
- PHP(OOPs), Laravel (PHP framework),
- JavaScript (jQuery),
- MySQL,
- SQL,
- HTML5, CSS

SOFT SKILLS

- Adaptability
- Active listening
- Teamwork
- Leadership

PROJECTS

Interior Design Website

Developed a dynamic website for an interior designer specializing in kitchen and office cabin designs using the Laravel PHP framework. Key features of the website include

- **About the Designer:** Detailed information about the designer’s experience and expertise.
- **Services Offered:** Comprehensive descriptions of various services provided, including kitchen and office cabin design.
- **Portfolio:** Showcased completed projects with images and descriptions.
- **Contact Information:** An interactive contact form with real-time validation and submission capabilities, along with other contact details for client inquiries.
- **Admin panel:** A secure admin panel for managing content, including project listings and service details.

Laravel was used for robust backend functionality and security, while AJAX enhanced the overall user experience.

(E-Commerce Website)

(Developed a dynamic e-commerce website leveraging AJAX, PHP, and jQuery technologies to enhance user experience and streamline functionality. Implemented robust validation techniques to ensure data integrity and security throughout the platform)
